SUSAN SAVION

In her book, *Quoting Matilda: The Words and History of a Forgotten Suffragist*, author Susan Savion champions Matilda Joselyn Gage, a determined woman who, together with other 19th-century suffragist women, used her voice to stand up against inequalities and injustices. She was also a strong abolitionist and an advocate for Native Americans. This important book highlights the activism and achievements of Gage, who has been forgotten in history because she was branded as too radical. Gage held top positions in the suffrage movement, wrote speeches for Susan B. Anthony, and delivered intellectually brilliant speeches herself. Each page presents a quote from Matilda that is accompanied with biographical information on the significance of her life and political activism. Gage is also known as the mother-in-law of L. Frank Baum, author of *The Wizard of Oz* books which were heavily influenced by Gage's ideology.

Savion takes readers on a historical journey using Matilda's own words and categorizing the highlights of her life through carefully researched "snapshot" passages along with many photographs. *Quoting Matilda* and Gage's book, *Woman, Church and State*, are relevant and significant today as the US still struggles with social issues and inequality. Let her words compiled in this book encourage the lioness inside of you!
