David Random is not a one-genre author. This time, he has crafted a mind-boggling crime novel that the Hollywood Book Review describes as, "...a work of fiction that aims to push the genre of crime-writing into the future."

Random's novel, *Connected*, winner of the Pinnacle Book Achievement Award, begins with a murder in which the killer's brother comes forward as an eyewitness and the murderer confesses. The intrigue begins, however, when we learn that the murderer and his eyewitness brother are conjoined twins making it impossible for the murderer to be held in custody without also locking up his innocent brother. The unprecedented struggles of the legal system will captivate readers as they try to imagine what they would do if they were the judge.

Rarely can the first few pages of a book capture a reader's interest. But reading *Connected* by David Random is unquestionably one of those uncommon books. Mystery lovers should not miss this masterpiece!
